Please find below and/or attached an Office communication concerning this application or proceeding.

## Office Action Summary

Application No.

10/626,989

Applicant(s)

BARONE ET AL.

Examiner

Monica A. Fontaine

Art Unit

1732

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 25 July 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-18 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-18 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 25 July 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date 072503,122204,012405

- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

## **DETAILED ACTION**

### ***Claim Objections***

Claim 1 is objected to because of the following informalities: It is believed that the phrase “during the forming of the shaving aid body” which spans lines 4-5 is an extraneous phrase since it follows the phrase “forming a shaving aid body...”. Appropriate correction is required.

Claim 11 is objected to because of the following informalities: It is believed that a phrase such as --producing a-- is missing between the words “for” and “shaving” in line 1. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-6, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Conrad, Jr. et al. (U.S. Patent 5,079,839). Regarding Claim 1, Conrad, Jr. et al., hereafter “Conrad, Jr.,” show that it is known to carry out a method for producing a shaving cartridge (Abstract), comprising the steps of forming a base having features for attaching the shaving aid cartridge to a razor assembly (Column 2, lines 43-44); and forming a shaving body attached to the base during the forming of the shaving body (Column 2, lines 38-42).

Art Unit: 1732

Regarding Claim 2, Conrad, Jr. shows the process as claimed as discussed in the rejection of Claim 1 above, including a method wherein the base comprises a thermoplastic material (Column 2, lines 43-44).

Regarding Claim 3, Conrad, Jr. shows the process as claimed as discussed in the rejection of Claim 1 above, including a method wherein the shaving aid body comprises an erodable material (Column 2, line 40).

Regarding Claim 5, Conrad, Jr. shows the process as claimed as discussed in the rejection of Claim 1 above, including a method wherein the step of forming of the shaving aid body comprises the step of injecting a shaving aid material in a flowable form into a closed mold containing the base (Column 2, lines 38-42; Column 3, lines 38-42).

Regarding Claim 6, Conrad, Jr. shows the process as claimed as discussed in the rejection of Claims 1 and 5 above, including a method wherein the shaving aid body comprises an erodable shaving aid material (Column 2, line 40).

Regarding Claim 8, Conrad, Jr. shows the process as claimed as discussed in the rejection of Claim 1 above, including a method wherein the step of forming the base comprises the step of injecting a thermoplastic material into a first mold (Column 2, lines 43-44).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Conrad, Jr., in view of Yin et al. (U.S. Patent 5,711,076).

Regarding Claim 4, Conrad, Jr. shows the process as claimed as discussed in the rejection of Claim 1 above, but he does not show a shaving aid body that comprises a soap material. Yin et al., hereafter "Yin," show that it is known to carry out a method for making a shaving aid cartridge wherein the shaving aid body comprises a soap material (Column 4, lines 49-56). Yin and Conrad, Jr. are combinable because they are concerned with a similar technical field, namely, methods of making shaving aids. It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to use Yin's soap material in Conrad, Jr.'s molding method in order to make a shaving aid that accomplishes two purposes (i.e. shaving and cleaning) at once.

Regarding Claim 7, Conrad, Jr. shows the process as claimed as discussed in the rejection of Claims 1, 5, and 6 above, but he does not show a shaving aid body that comprises a soap material. Yin shows that it is known to carry out a method for making a shaving aid cartridge wherein the shaving aid body comprises a soap material (Column 4, lines 49-56). It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to use Yin's soap material in Conrad, Jr.'s molding method in order to make a shaving aid that accomplishes two purposes (i.e. shaving and cleaning) at once.

Claims 9, 11, 14, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Conrad, Jr., in view of Vreeland et al. (U.S. Patent 5,345,680).

Regarding Claim 9, Conrad, Jr. shows the process as claimed as discussed in the rejection of Claims 1 and 8 above, but he does not show using a second mold for the injection of the shaving aid material. Vreeland et al., hereafter "Vreeland," show that it is known to carry out a method for making a shaving article comprising the steps of disposing the base within a closed second mold (Column 4, lines 1-3); and injecting a shaving aid material in a flowable form into the second mold (Column 4, lines 3-5). Vreeland and Conrad, Jr. are combinable because they are concerned with a similar technical field, namely, methods of making shaving articles. It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to use Vreeland's second mold during Conrad, Jr.'s process in order to increase the rate of production (i.e. while the shaving aid is being molded into the second mold, a base can be being molded in the first mold).

Regarding Claim 11, Conrad, Jr. shows that it is known to carry out a method for [producing a] shaving aid cartridge (Abstract) comprising the steps of injecting a thermoplastic material into a closed first mold to form a base (Column 2, lines 43-44); injecting a shaving aid material into the second mold to form a shaving aid body (Column 2, lines 38-42; Column 3, lines 38-42); and removing the shaving aid cartridge that includes the base coupled to the shaving aid body from the mold (Column 3, lines 38-42). Conrad, Jr. does not show using two molds for his sequential injection molding. Vreeland shows that it is known to carry out a method including using a first mold to form the base, the first mold including a base portion and a common portion (Column 3, lines 67-68; Column 4, line 1) and engaging the common portion of the first mold with a shaving aid body portion to form a closed second mold, wherein the base remains with the common portion and is disposed within the second mold (Column 4, lines 1-5;

Art Unit: 1732

It is noted that the modifications needed to form the second mold are being considered the “shaving aid body portion” of the second mold.). It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to use Vreeland’s second mold during Conrad, Jr.’s process in order to increase the rate of production (i.e. while the shaving aid is being molded into the second mold, a base can be being molded in the first mold).

Regarding Claim 14, Conrad, Jr. shows the process as claimed as discussed in the rejection of Claim 11 above, but he does not show using a common portion between two molds. Vreeland shows that it is known in the prior art to carry out a method wherein the common portion includes voids shaped to form features operable to attach the shaving aid cartridge to a razor assembly (Column 1, lines 16-22). It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to use Vreeland’s teaching of attaching features in Conrad, Jr.’s molding process in order to ensure proper adherence between the firstly-molded base and the secondly-molded erodable material.

Regarding Claim 17, Conrad, Jr. shows the process as claimed as discussed in the rejection of Claim 11 above, including a method wherein the shaving aid body comprises an erodable material (Column 2, line 40), meeting applicant’s claim.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Conrad, Jr., in view of Brown et al. (U.S. Patent 6,852,262). Conrad, Jr. shows the process as claimed as discussed in the rejection of Claims 1, 8, and 9 above, but he does not show cooling a second mold. Brown et al., hereafter “Brown,” show that it is known to carry out a method of making a shaving article comprising the step of cooling at least a portion of a second mold (Column 3,

Art Unit: 1732

lines 16-25; Column 8, lines 4-10). Brown and Conrad, Jr. are combinable because they are concerned with a similar technical field, namely, methods of making shaving articles. It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to use Brown's cooling step in Conrad, Jr.'s molding process in order to expedite the time required before article ejection (and thus, expedite the entire molding cycle time).

Claims 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Conrad, Jr., in view of Vreeland, further in view of Brown.

Regarding Claim 12, Conrad, Jr. shows the process as claimed as discussed in the rejection of Claim 11 above, but he does not show cooling a second mold. Brown shows that it is known to carry out a method of making a shaving article comprising the step of cooling at least a portion of a second mold (Column 3, lines 16-25; Column 8, lines 4-10). It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to use Brown's cooling step in Conrad, Jr.'s and Vreeland's molding process in order to expedite the time required before article ejection (and thus, expedite the entire molding cycle time).

Regarding Claim 13, Conrad, Jr. shows the process as claimed as discussed in the rejection of Claim 11 above, but he does not show cooling a second mold to a temperature below a solidification temperature of the shaving material. Brown shows that it is known to carry out a method of making a shaving article comprising the step of cooling at least a portion of a second mold (Column 3, lines 16-25; Column 8, lines 4-10; It is noted that if the mold was not cooled to a temperature below the solidification temperature of the shaving aid material, the shaving aid material would not solidify.). It would have been prima facie obvious to one of ordinary skill in

Art Unit: 1732

the art at the time the invention was made to use Brown's cooling step in Conrad, Jr.'s and Vreeland's molding process in order to expedite the time required before article ejection (and thus, expedite the entire molding cycle time).

Claims 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Conrad, Jr., in view of Vreeland, further in view of Reischl (U.S. Patent 4,595,709).

Regarding Claim 15, Conrad, Jr. shows the process as claimed as discussed in the rejection of Claims 11 and 14 above, but he does not specifically show using a screw type mixer. Reischl shows that it is known to carry out a process for molding thermoplastic articles wherein the material is processed into a flowable state using a screw type mixer (Column 3, lines 23-40). Reischl and Conrad, Jr. are combinable because they are concerned with a similar technical field, namely, methods of making plastic articles. It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to use Reischl's screw type mixer during Conrad, Jr.'s and Vreeland's molding process in order to product articles having unexpectedly good mechanical properties.

Regarding Claim 16, Conrad, Jr. shows the process as claimed as discussed in the rejection of Claims 11, 14, and 15 above, but he does not show using a cooled screw type mixer. Reischl shows that it is known to carry out a process wherein at least a portion of the screw type mixer is cooled during the processing of the material (Column 4, lines 7-10). It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to use Reischl's cooled screw type mixer during Conrad, Jr.'s and Vreeland's molding process in order to ensure proper material processing.

Art Unit: 1732

Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Conrad, Jr., in view of Vreeland, further in view of Yin. Conrad, Jr. shows the process as claimed as discussed in the rejection of Claims 11 and 17 above, but he does not show a shaving aid body that comprises a soap material. Yin shows that it is known to carry out a method for making a shaving aid cartridge wherein the shaving aid body comprises a soap material (Column 4, lines 49-56). It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to use Yin's soap material in Conrad, Jr.'s and Vreeland's molding method in order to make a shaving aid that accomplishes two purposes (i.e. shaving and cleaning) at once.

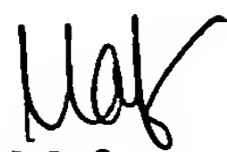

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monica A. Fontaine whose telephone number is 571-272-1198. The examiner can normally be reached on Monday-Friday 7:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mike Colaianni can be reached on 571-272-1196. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Art Unit: 1732

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
